## Those Cleanups You Hate

Tackle them today—the easy way

**Our grandmas did** these dirty jobs regularly; now we can hardly bear to face them once or twice a year. Here's how to get them over with, fast.

### 1 GUNK ON KITCHEN CABINETS

If your cupboards are painted or laminated, use a liquid all-purpose cleaner like Mr. Clean Multi-Surface Spray. Rinse with a soft cloth, and dry. For finished wood, de-film with a product that's specially made for that

surface. Try Weiman Furniture Cleaner (\$5.49), which beat five competitors in GH Research Institute tests.

**Tip** Every few days, quick-wipe the cabinets nearest your stove with a damp cloth—then you can postpone the big job even longer.
